

## CODES AAC Activity of the Week

### Messages at home

This activity will help your child to learn to use their communication system to give messages to different people in the house. They will also get some practice talking to a variety of people. This is good practice for using the device out and about in the community when we are all allowed to do so. Here are some examples

- ★ Give your child the job of telling the family “dinner is ready”
- ★ Encourage your child to go and ask mum “do you want a cup of tea?”
- ★ Support your child to tell Dad “help... we’ve lost the remote!”
- ★ Give your child the job of telling everyone else it is time to go for a walk.

***Symbols and vocabulary you will need: a message button which you can change each day. This can be used on a Big Mack, One step or any other communication device.***
