

## CODES AAC Activity of the Week

### Build a House

This activity you will help the child build a house out of shapes. Cut out different coloured shapes including a square for the house, a rectangle for the door, little squares for windows. You can also include some trees and flowers to put around the house.

- ★ Your child can use their communication system to tell you which shape you need to build the house step by step.
- ★ Ask them what shape do we need next?
- ★ They will give you an answer such as rectangle, square, tree, flower
- ★ You can then glue the shapes on one at a time
- ★ At the end of the activity your child has a picture they can show off.

***Symbols and vocabulary you will need: house, square, rectangle, circle, small, big, tree, flower.***
