

## CODES AAC Activity of the Week

### You Do It!

This activity will help your child begin to use language to direct others.

- ★ Identify 10 actions that you or another person will be able to do
- ★ The child selects the action on their communication aid and you will perform it. For example, “wave your hands”
- ★ Keep doing the action until the child says STOP!
- ★ you can also play this with more than one person. The child can then say who is to do the action and then give the direction. For example, “Mommy, stamp your feet.

***Symbols and vocabulary you will need: the starter phrase ten actions, the word STOP! and the names of the people playing the game.***
