

CODES AAC Activity of the Week

Match the letter

This activity will help your child begin to engage with letters of the alphabet and a keyboard.

- ★ Write all the letters of the alphabet on post it notes. Duplicate them
- ★ Put one set of post it notes with the full alphabet up on a wall in your hallway.
- ★ Mix up the second set of post it notes into a random order.
- ★ Have your child pick a post it note from the random pile. After he picks the letter he can say what letter it is by matching it on the keyboard. Then your child can take his post it note and match it to the correct one on your hallway wall.
- ★ Do this until you have matched all 26 letters.

Symbols and vocabulary you will need: Access to a keyboard either QWERTY or ABC on your communication device.
